420 HUNTER MOAH

supporting your precision

420 HUNTER MOAH

Designed for hunters who demand both precision and speed, the ZCO MOAH (MOA Hunter reticle) gives tradition an upgrade. The heavy primary stadia guide the eye naturally to the center dot for fast target acquisition even at low power and in low light situations. The 1 MOA hash marks allow for precise wind or moving target holds without losing sight of your target. With a clean and open reticle design, hunters can utilize the entire magnification range without compromising precision. Whether hunting in dense vegetation, low light, or wide-open terrain, this reticle delivers clarity and precision to meet any hunter needs.
